RE: Letter of Assurance for Pesticides and Inert Ingredients

To Whom It May Concern:

Kam's Growers Supply Inc. (KGSI) only distributes products registered by Health Canada under the Pest Control Act (S.C. 2002, c.28). All products distributed contain only active ingredients and inert ingredients that have been approved by the Pest Management Regulatory Agency (PMRA) for use in food-use pesticide products due to a tolerance or tolerances exempt being established.

The PMRA in making a determination evaluates not only the toxicity of the chemical substance, but also considers the particular exposures that could occur and the need for any restrictions. The inert ingredients are classified by PMRA on the basis of peer-reviewed studies which demonstrate no carcinogenicity, adverse reproductive effects, neurotoxicity or other chronic effects, developmental toxicity (birth defects), ecological effects, or the potential for bioaccumulation. The PMRA, as part of a registration package for each KGSI distributed pesticide product, reviews the Statement of Product Specifications Form to ensure that only PMRA approved active ingredients and approved inerts are being used in the manufacturing process of the product.

KGSI is in good standing with the Crop Protection Institute of Canada and each warehouse is certified bi-annually by the Agrichemical Warehousing Standards Association (AWSA).

If you have an additional questions or concerns, please contact me by telephone 519-821-1684 ext 1222 or jfordyce@kams.ca by email.

Sincerely,

A handwritten signature in black ink, appearing to read "J Fordyce", with a long horizontal line extending to the right.
